

The Ultimate Talk Radio – Chat with Friends and Listen to FM

Kenwood's new UBZ-GR14 has a dual personality. As well as offering "toll-free" FRS communications with friends and family, it's also a stereo FM radio. And in FRS/FM mode you can actually listen to your favorite FM station while monitoring a designated channel — the transceiver automatically switches over as soon as there's an FRS signal, and back to FM when your conversation is over. With such features as backlighting, call alert and long hours of operation, this all adds up to one of the coolest radios ever.

▶ 38 Talk Groups

▶ Channel Scan

▶ Up to 2-mile Range

▶ Stereo Headset Included

M: Hi, what's up?

J: I'm just listening to the radio.

M: And listening out for me too?

J: Of course! I can do both with
this new FreeTalk.
